

LOWRANCE®

Hunting with Endura™ Outdoor GPS

Endura Hunting Specific Features:

- **Over 25 Hunting specific icons** including tree stand, blind, decoy, food plots, camera location, tracks, rubs, blood trail, ATV, truck, etc.
- **Ability to customize all 6 fields of the Trip Computer specifically for hunting.** This includes Distance to tree stand (Distance to Next), Direction of tree stand (Bearing to Next), clock, Barometric pressure (Safari and Sierra models only), and sunrise and sunset times.
- **Game Camera support** for SD card cameras with Picture Viewer (for all Endura models) and Video Player (Safari and Sierra only).
Note: microSD card and SD adapter required
- **Day & Night Viewability** - Ability to quickly lower screen brightness to as low as 1% for viewability at night but without advertising your location to game or waterfowl. Trip Computer with dark background and white text is perfect for night navigation. Daylight viewability minimizes need for backlighting and battery drain.
- **Improved Hunting Safety and Effectiveness** - Ability to not only record the location of all tree stands and blinds, but to also record a trail for each so that you can navigate your way to a hunting site safely in the dark without disturbing game bedding areas and leaving extra scent trail due to wandering around. All blinds and trails can also be viewed on Google Earth and shared with hunting partners by email.
- **Voice Notes** – Give yourself or others hints and tips i.e. “Approach on left side of tree to avoid briars” when marking tree stands, blinds, etc. as waypoints with the Voice Notes function
- **Operating Temperature** - - 4° F to +120° F
- **Storage Temperature** - - 40° F to +185° F
